# The latex-lab-minipage package

Changes related to the tagging of minipage and parbox

LATEX Project\* v0.81e 2024-09-18

#### Abstract

### 1 Introduction

How to best tag minipages and parboxes is still under discussion. But as they start and contain paragraphs it is clear that some sockets are needed to interrupt and restart the tagging.

The tagging added is currently quite simple-minded. See the todo-testfiles and the code comments for some open points.

One of the main problems is how to properly embed them in the surrounding. When used in normal text (in a paragraph) they typically should close the text structure and reopen one at the end. But when used inside low-level \vbox or \hbox this is often wrong. The code uses now there two sockets tagsupport/parbox/before and tagsupport/parbox/after which can be set to noop, if necessary.

1 (\*package)

## 2 Implementation

- 2 \ProvidesExplPackage {latex-lab-testphase-minipage}
- {\ltlabminipagedate} {\ltlabminipageversion}
- 4 {Code related to the tagging of minipages and parboxes}

As minipage uses a socket from the footnote code we must load the OR-code:

- 5 \RequirePackage{latex-lab-testphase-new-or-1}
- 6 \RequirePackage{latex-lab-testphase-new-or-2}

### 2.1 Provide the kernel hooks

[kernel?] We need to check/set the status before the initial \leavevmode to decide how to handle the structure. Perhaps the same command will work for both?

- 7 \def\@kernel@init@minipage{}
- 8 \def\@kernel@init@parbox{}

<sup>\*</sup>Initial implementation done by Ulrike Fischer

We use sockets for the tag support code, as there will be cases where we want to exchange the content or disable it.

```
9 \socket_new:nn {tagsupport/minipage/before}{0}
10 \socket_new:nn {tagsupport/minipage/after} {0}
11 \socket_new:nn {tagsupport/parbox/before} {0}
12 \socket_new:nn {tagsupport/parbox/after}{0}
```

### 2.2 Patch minipage

[kernel?] The begin hook is inserted in \@iiminipage

```
13 \def\@iiiminipage#1#2[#3]#4{%
```

\@kernel@init@minipage

Before switching to hmode we insert a hook. It is currently unused but could for example check if we are in vmode and change the following paragraph tag.

```
\leavevmode
 15
     \@pboxswfalse
 16
     \setlength\@tempdima{#4}%
     \def\@mpargs{{#1}{#2}[#3]{#4}}%
 18
insert the socket
     \UseTaggingSocket{minipage/before}% new
     \setbox\@tempboxa\vbox\bgroup
 20
       \color@begingroup
 21
          \hsize\@tempdima
 22
          \textwidth\hsize \columnwidth\hsize
 23
         \@parboxrestore
```

minipages are perhaps used in environments where the tagging of paragraphs has been altered. So we try to restore this. TODO: this should perhaps be done in \@parboxrestore directly.

```
\text{VuseTaggingSocket{para/restore}}
\text{def\@mpfn{mpfootnote}\def\thempfn{\thempfootnote}\c@mpfootnote\z@
\text{vsocket_assign_plug:nn{fntext/process}{mp}}%
\text{vlistdepth\@mplistdepth\c@mplistdepth\z@
\text{ominipagerestore}
\text{vsocket_assign_plug:nn{fntext/process}{mp}}%
\text{vmplistdepth\z@mplistdepth\z@
\text{vmplistdepth\z@mplistdepth}}
\text{And a hook at the end}
```

```
31 \def\endminipage{%
      \par
32
      \unskip
33
      \ifvoid\@mpfootins\else
34
         \vskip\skip\@mpfootins
35
         \normalcolor
36
         \footnoterule
         \unvbox\@mpfootins
      \@minipagefalse
                          %% added 24 May 89
    \color@endgroup
41
    \egroup
```

As the parbox command is called, we must prevent that it adds its additional tagging commands:

```
\tag_suspend:n{minipage}
43
    \expandafter\@iiiparbox\@mpargs{\unvbox\@tempboxa}%
44
    \tag_resume:n{minipage}
45
    \UseTaggingSocket{minipage/after} %new end ...
46
47
   And similar for \parbox
48 \long\def\@iiiparbox#1#2[#3]#4#5{%
    \@kernel@init@parbox
    \leavevmode
50
    \@pboxswfalse
51
    \setlength\@tempdima{#4}%
52
    \UseTaggingSocket{parbox/before}
53
    \@begin@tempboxa\vbox{\hsize\@tempdima\@parboxrestore
```

parbox are perhaps used in environments where the tagging of paragraphs has been altered. So we try to restore this. TODO: this should perhaps be done in \@parboxrestore directly.

```
\UseTaggingSocket{para/restore}
                            #5\@@par}%
56
                                         \int x\relax#2\else
57
                                                      \verb|\eff| \end{thmod} $$ \end{thmod}
58
                                                       \edef\@parboxto{to\the\@tempdimb}%
59
                                         \fi
60
                                         \if#1b\vbox
61
                                         \else\if #1t\vtop
62
                                         \else\ifmmode\vcenter
63
                                         \else\@pboxswtrue $\vcenter
64
                                          \fi\fi\fi
65
                                         \@parboxto{\let\hss\vss\let\unhbox\unvbox
                                                             \csname bm@#3\endcsname}%
                                        \if@pboxsw \m@th$\fi
                            \@end@tempboxa%
                           \UseTaggingSocket{parbox/after}
70
71
```

### 2.3 Tagging commands

```
72 \tl_new:N \l__ltboxes_tag_tl
73 \tl_set:Nn \l__ltboxes_tag_tl {Div}
74 \socket_new_plug:nnn{tagsupport/minipage/before}{tag/dflt}
75 {
```

As there was a **\leavevmode** before that is a P/text open that we have to close if para tagging is active:

```
76  \tag_mc_end_push:
77  \bool_if:NT \l__tag_para_bool {\tag_struct_end:}
```

TODO: the P can be further up, we need a proper method to test and handle this.

```
78 \tag_struct_begin:n{tag=\l__ltboxes_tag_tl}
70 }
```

similar for the other sockets:

```
80 \socket_new_plug:nnn{tagsupport/minipage/after}{tag/dflt}
```

```
{
  81
                   \tag_struct_end:
  82
                   \bool_if:NT \l__tag_para_bool {\tag_struct_begin:n{tag=\l__tag_para_tag_tl}}
  83
                  \tag_mc_begin_pop:n{}
  84
  85
  86
          \socket_new_plug:nnn{tagsupport/parbox/before}{tag/dflt}
  87
  88
                   \tag_mc_end_push:
                  \bool_if:NT \l__tag_para_bool {\tag_struct_end:}
  90
                  \tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag=\line(tag
  91
  92
  93
          \socket_new_plug:nnn{tagsupport/parbox/after}{tag/dflt}
  94
               {
  95
                   \tag_struct_end:
  96
                   \bool_if:NT \l__tag_para_bool {\tag_struct_begin:n{tag=\l__tag_para_tag_tl}}
  97
                   \tag_mc_begin_pop:n{}
  98
                  }
  99
Activate the default tagging plug
\socket_assign_plug:nn{tagsupport/minipage/before}{tag/dflt}
         \socket_assign_plug:nn{tagsupport/minipage/after} {tag/dflt}
         \socket_assign_plug:nn{tagsupport/parbox/before} {tag/dflt}
         \socket_assign_plug:nn{tagsupport/parbox/after}
                                                                                                                                                                  {tag/dflt}
